SUMMARY

Full Stack Developer with experience building AI-powered web applications using React, Next.js, Django, FastAPI, and LLM-based workflows. Skilled in scalable backend architecture, real-time transcription systems, NLP pipelines, and production deployment. Passionate about building performance-focused software solving real business problems.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), HTML5, CSS3, SQL
Frameworks & Libraries: React.js, Next.js, FastAPI, Django, Express.js, Tailwind CSS, Redux Toolkit, Bootstrap
Databases: MySQL, PostgreSQL, MongoDB, SQLite
AI/ML Tools: Groq (Llama 3), OpenAI Whisper, NLP Pipelines, Speaker Diarization
Tools & Platforms: Git, GitHub, VS Code, Postman
Deployment: Vercel, Render, Hugging Face Spaces, AWS

EXPERIENCE

GK Plastic Industries Jalandhar, Punjab, India
Full Stack Web Developer July 2024 – February 2026

- Developed and maintained a responsive business website using React and Tailwind CSS for 100+ industrial products, improving product discoverability and reducing manual update effort by 35%.
- Improved UI responsiveness and SEO structure, enhancing product visibility and customer engagement.
- Collaborated with management to streamline product update workflows and reduce manual content management effort.

PROJECTS | github.com/Codecrafter2807

AI Meeting Notes Generator | *Python, Next.js, Whisper, Groq, Django* | meet-ai-frontend-xi.vercel.app

- Production-deployed system converting multi-speaker audio into structured notes, action items, and summaries.
- Engineered a chunked streaming transcription pipeline utilizing OpenAI Whisper, enabling real-time feedback on lengthy audio files and improving data processing efficiency by 40%.
- Optimized LLM inference latency via Groq APIs (Llama 3), achieving faster summarization vs. standard endpoints.
- Designed speaker diarization pipeline with PyAnnote for per-speaker timestamp alignment across multi-participant meetings.

AI-First CRM: HCP Interaction Module | *React, FastAPI, LangGraph, Groq, MySQL*

- AI-first CRM for pharma reps using a LangGraph + Groq (Llama-3.3-70b) assistant that auto-fills forms from natural language.
- Implemented smart merge logic and medical entity extraction to auto-identify drug names, symptoms, and specialties.
- Stack: React (Vite) + Redux Toolkit frontend, FastAPI/SQLAlchemy backend, MySQL database.

Supervisor Feedback Analyzer | *React, Django REST, Llama 3.2, Ollama*

- Reduced supervisor feedback assessment time from 60 mins to under 10 mins via structured LLM drafts.
- Multi-stage JSON extraction with regex fallbacks for reliable output from Llama 3.2 (3B) local model.
- Confidence scoring and bias detection badges to prevent automation bias and enforce human review.

Doctor Appointment Booking & Review App | *React.js, Tailwind CSS, Express.js, MongoDB*

- Full-stack booking and review platform with user auth, appointment scheduling, and patient reviews.
- Designed RESTful APIs with Express.js and a responsive mobile-first UI using React.js and Tailwind CSS.

EDUCATION

Lyallpur Khalsa College of Engineering Jalandhar, Punjab, India
Master of Computer Applications (MCA) – Computer Science July 2024 – May 2026

DAV College, Jalandhar Jalandhar, Punjab, India
Bachelor of Computer Applications (BCA) – Computer Science September 2021 – May 2024

CERTIFICATIONS

Web Development in Python | *Webdox Computer Institute (ISO 9001-2015 Certified)* | Cert. No. ICI/1161736/21

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native), Punjabi (Native)
Interests: Full Stack Web Development, Data Analytics, AI Integration, System Design, Open Source Contribution
